VANSHIKA BANSAL

Full Stack Developer • Next.js • React.js • Node.js • MongoDB
New Delhi • +91 9773708081 • vanshikabansal887@gmail.com • LinkedIn • GitHub • Portfolio

SUMMARY

Full Stack Developer (B.Tech ICE, 2024–28) proficient in C, Python, and JavaScript, with internship experience at Zetheta, Inamigos, and CodeAlpha. Skilled in React.js, Next.js, Node.js, Express.js, and MongoDB. Currently learning Data Structures & Algorithms. Passionate about building scalable, user-centric web applications aligned with Google's engineering standards.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), C, Python, HTML5, CSS3
Frontend	React.js, Next.js 14, Responsive Web Design, Tailwind CSS
Backend	Node.js, Express.js, NextAuth, REST API Development
Database	MongoDB, Mongoose
Tools	Git, GitHub, VS Code, Vite, npm
Web Tech	REST APIs, JWT Auth, HTML5 Audio/Video API, Canvas API, LocalStorage
IoT / HW	Arduino Uno, ESP32, Sensor Integration
Core CS	Data Structures & Algorithms (Currently Learning)

EXPERIENCE

Web Developer Intern • Zetheta June 2026
- Developed and maintained web applications as part of the Zetheta development team.

Web Developer Intern • Inamigos June 2026
- Contributed to frontend and backend web development tasks within the Inamigos platform.

Web Developer Intern • CodeAlpha June 2026
- Built web development projects as part of the CodeAlpha virtual internship program.

Faculty Member (Remote) • BunktoBrains Aug 2025 – Jan 2026
- Created digital learning resources for Applied Mathematics, improving student engagement through tech-enabled instructional methods.

Campus Ambassador • DevTown & Wayspire Jan – Feb 2025
- Championed developer events and workshops, increasing student participation across technical communities.

PROJECTS

AuraPrep AI | AI-Powered Interview Preparation • Live Demo
Tech: Next.js, React.js, AI Integration, Tailwind CSS
- Engineered an AI-powered mock interview platform with resume-based question generation, evaluation workflows, and analytics dashboards.

SAMTULAN | Full Stack Wellness Platform • Live Demo
Tech: Next.js 14, React.js, NextAuth, MongoDB, Tailwind CSS
- Built a wellness management app with authentication, protected routes, responsive dashboards, and MongoDB integration.

Travel Planner (EasyGo) | AI-Powered Travel Platform • Live Demo
Tech: Next.js, React.js, Google Maps API, Gemini AI
- Developed an AI-driven planner leveraging Google Maps API and Gemini AI for personalized itineraries and real-time route assistance.

Netflix Clone | Streaming Platform • Live Demo
Tech: Node.js, Express.js, MongoDB, JWT Auth, HTML5, CSS3
- Architected a full-stack streaming platform with JWT authentication, RESTful APIs, and a responsive mobile-first frontend.

Aggarwal Commercial | Business Website • Live Demo
Tech: Node.js, Express.js, MongoDB, HTML5, CSS3
- Designed a responsive business website with server-side routing, dynamic database connectivity, and mobile optimization.

Spotify Clone | Music Platform • Live Demo
Tech: HTML5, CSS3, JavaScript, Audio API
- Created a music player with playback controls, seek tracking, live filtering, and dynamic playlists using HTML5 Audio API.

Athena Portal | Browser-Based Game • Live Demo
Tech: React.js, Vite, JavaScript, CSS3
- Developed an interactive browser game with dynamic mechanics, smooth UI transitions, and component-based React architecture.

Salary Calculator | Personal Finance & CTC Planner • Live Demo
Tech: Next.js, React.js, JavaScript, Financial Analytics, PDF Export
- Built a finance dashboard for net salary, tax regime comparison, CTC breakdown, and downloadable PDF reports.

EDUCATION

Bharati Vidyapeeth College of Engineering, Delhi • B.Tech – Instrumentation & Control Engineering • 2024–2028

ADDITIONAL TECHNICAL PROJECTS

- **Smart Predictive Maintenance** — Arduino Uno, C++ — Machine health monitoring via vibration and temperature analytics.
- **Smart Drainage Monitor** — ESP32, ThingSpeak — Cloud-connected water quality monitoring with real-time telemetry.
- **Temp & Humidity Detector** — Arduino/ESP8266, DHT11/22, LCD — Embedded environmental monitoring for real-time sensor readings.
- **Digital Counter** — Arduino Uno, 7-Seg Display — Digital counting system built on embedded hardware fundamentals.
